### On Page – Hot keywords optimization for web pages

- Current status: hot keywords are available for most pages on the navigation part, but the amount of keywords are limited.
- Solution: Usually, search result pages get higher ranking weight defined by search engines due to the higher content relevancy. These pages can also include plentiful links to other pages. So more pages with hot keywords should be generated and more relevant links should be added.

## On-page Factors – Web Page URL

#### PayPal Help Centre-Get Answers to Your PayPal Questions-...

https://www.paypal.com/hk/cgibin/webscr?cmd=xpt/Marketing/securitycen ter/sell/Index-outside&nav=1.3

### Ourrent Status:

 URL is too long, contains a lot of special symbols, and search engines can not interpret.

### Solution:

 Simplify the web site URL not contain special symbols, such as: "?" "&"

## On Page – Dynamic and Static Pages

https://www.paypal.com/hk/cgi-bin/webscr?cmd=\_auctionoutside&nav=2.1&locale.x=zh HK

- Current Status: The link to the forum is available on many main pages, but URL links are dynamic. Oppositely, all the pages in BBS forum are static. Applying such different methods are extremely unfriendly to SEO.
- Solution: Unify the URL links on site into static ones and stop search engine crawlers from crawling dynamic pages.

## On Page - SiteMap

## Off-page – Backlinks on Paypal.com.hk

- Backlinks (or links pointing to www.paypal.com.hk):
- Currently <u>www.paypal.com.hk</u> has 52 external links pointing to its domain.
- The qualify of most external links are low. Few external links are from external sites' homepages.
- Lack of external links with high PR.
- Comparing with competitors, both the quality and quantity of external links are low.

## Off Page – Total No. of Backlinks & Quality

- The total number and quality of backlinks are critical to your website's page rank. To improve your page rank and search relevancy, you should:
- Increase number of backlinks from external websites more popular and reputable websites (i.e., high Google PageRank sites) have greater impact on improving your page rank.
- Improve quality of backlinks links coming from other websites within your industry or websites that contain similar subject matter content will result in a higher page rank.
- Increase internal domain backlinks revisit your site design and ensure that other web pages within your domain are also linking back to your main web page.
- Lower volume keywords backlinks Link building towards lower volume keywords and ranking better against the same

## Quality Analyzer Report for Paypal.com.hk

- Indexed Pages in Google China!
- 3 pages in Google's index The website is in Google's index.
- Indexed Pages in Baidu!
- 2 pages in Baidu's index The website is in Baidu's index.
- o Links to Website in Yahoo!
- 2 pages link to this website A large amount of external links are with low weight or PR. Compared with competitors, the total amount of external links is not enough. The number of links to external sites on Paypal is small, which needs to be increased.

## **Competitive Analysis**

- Root Keyword: 网上支付, 电子商务 (In EN: Online Payment, E-commerce)
- Competitive analysis is the very first thing one should do when planning to build a website, or commencing an online marketing campaign. This is a continuous process, and you will need to regularly review your own competitive analysis when building, promoting your site, or contemplating a strategic online position.
- Your main organic search engine ranking competitors within Google & Partners, and, as per your root keyword, are;
- o Legend:
- DA: Domain Age
- PR: PageRank
- GIC: Gogel Index Count
- PB: Page Backlinks
- BIC: Baidu Index Count
